

MA Demux PCB 2-channel

Maxi, 230V/16A AC

Art.-No. 130404

MA demultiplexers receive DMX512 signals and convert them. For reasons of data integrity, any tapping of DMX signals is protected against over-voltage on MA devices.

The board comes with all needed technical information; however, the installation should be handled by a qualified professional.

Converts DMX512 into two analogue 0 to + 10V control signals with simultaneous control of two relays 24V/3A DC or 230V/3A AC. External power supply 15-25V DC.

Features

- PCB with integrated power supply for flexible design of DIY projects
- High-quality Wago terminals for all connections

Scope of delivery

power supply and Wago terminals on the board
operating manual

Technical Specifications

Dimensions	105 x 75 x 47mm / 4.1 x 3 x 1.9inch
Net weight	0.4kg / 0.9lbs
