

MA DMX-Optoisolator PCB

Art.-No. 130420

Signal booster with optical isolation between incoming and outgoing DMX line.

Perfectly suited for the installation in theater stage boxes, serving as signal distribution device in large scale DMX networks.

Features

- Optoisolator PCB with electrically isolated input and output for DMX lines
- Analogue inverter converts positive control signals 0-10V into negative ones

Scope of delivery

power supply and Wago terminals on the board
operating manual

Technical Specifications

Dimensions	115 x 44 x 40mm / 4.5 x 1.7 x 1.6inch
Net weight	0.5kg / 1.1lbs
